# TOP SEEDS INTERNATIONAL

## “Authentic Flavors”

We are an international company **specializing** in research and marketing of innovative hybrid varieties of high-quality vegetables.

We **believe** in collaborating closely with our customers and are committed to meeting all their needs.

Founded in Israel in 2003, we operate worldwide through subsidiary companies based in Israel, Spain, Italy and Mexico, and via distributors in more than 20 countries. Top Seeds International was acquired by the *Mitsui & Co Ltd group* in May 2017, and a part of *Japan Vegetable Seeds Group*.

Our aim is to guarantee high yields and excellent-tasting fruit by selecting varieties with genetic resistance to a wide range of diseases.

Through hard continuous field research, our geneticists, agronomists and agro-technicians select the best varieties of diverse vegetable variety portfolio in terms of resilience and profitability, including Tomatoes, Peppers, Cucumbers, Eggplants and Tomatoes Rootstock.

In order to meet the constantly-evolving horticultural market needs, we offer vegetable varieties that are suitable for greenhouse and open field cultivation and optimize the needs of both the fresh consumption and industrial processing segments.

We work closely with our partners along the vegetable value chain by developing innovative varieties and concepts with the aim of meeting all their individual needs.

Top Seeds is known for research, innovation and quality, from seed planting through to harvesting.

Discover our varieties.

# ROOTSTOCK

Improving quality and yield are the keys to remaining competitive in the increasingly professional world of horticulture, so grafting is increasingly becoming a widely adopted practice for small, large and specialty tomatoes with extraordinary shapes and colors. Our experts at Top Seeds International will be happy to help you choose the most suitable rootstock to maximize your yields. Our **Top Bental**, **Tawa** and **Top Gun** grafts were developed through years of breeding and selection and are ideal for the cultivation of small tomatoes such as **Cherry**, **Plum** and **Midi plum**, as well as large tomatoes such as **Cluster**, **Elongated** and **Beef**, and specialty tomatoes such as **Coeur De Bue**. Here's a closer look.

# ROOTSTOCK

**UNIFORM**  
**Tawa**  
**VERSATILE**  
**PRECOCIOUS**

Tawa is an intraspecific rootstock developed for short growing cycles that don't affect the organoleptic qualities of the fruits. The Tawa seed has a high degree of germinability and uniformity and is extremely precocious. The rootstock variety improves yields and increases dry matter production in short cycles. Its intraspecific adaptation ensures a very high grafting affinity.
